	This long-forgotten band from the NWOBHM is finally un-earthed for the first time ever since the 80's. They were originally called Heavy Thunder and then quickly changed their name to be the very first band with the name Slayer! They never really had a record deal and only one official release, which was a 3 song 7" single/EP back in 1984. This release combines their efforts from their 1982 demo, the 7" single and 1986 demo.
